138836	Vanilla *	6 x 473ML

— HOW? —

First, we flash heat the milk at very high temperatures, up to 144°C and eliminating in the process all bacteria without altering the nutritional qualities of the milk. Then, in a sealed environment, the milk is put into a protective, aseptic bottle that shields it from light, air and any contaminants. Throughout this entire process, nothing is added to our milk!

144°C
Heated for

Alternative Cheese

Imitation cheese greatly reduces production costs as it is generally cheaper than cheese. Made from soybean and/or palm oil it contains no trans-fat or cholesterol and is a good source of calcium. It can be used as a replacement for real cheese or it can be mixed with real cheese for added flavour.

NMS Code	Chef Nutri Imitation Cheese	Order	Pack
